

# Flow DSP + Speakers

## Dynamic EQ – Hearing Enhancement

- Restores loudness perception; equal perceived loudness but with lower sound pressure lowers the risk of hearing loss
- Corrects for environment acoustics with built-in mic

## Spatial Audio – Immersive Listening

- Stereo Virtualizer that widens the stereo image for closely-positioned stereo speakers

## Feedback Suppression – De-howling Like a Pro

- Powering market-leading Portable PA products since 2018 (10+ products)

## Audio Visualization

- Utilizing on-device LEDs to light up in different styles: VU meter, Spectrum meter, Waveform, on-Beat lighting
